

# When to Hang Up Your Helmet and Goggles?

The pilot population is getting older as we live longer. There is no age limit for holding a medical certificate and pilots have continued to fly successfully into their 80s. If you are getting on in years, there are some issues to understand and compensate for when you fly. Attend this informative briefing and find out! This is one of the six seminars available at the Maryland Regional Festival of Flight. Don't miss it!

**Directions:** Please see the "Additional Seminar Information" section for important driving and fly-in instructions.

## A message from the National FAASTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
